

# Information Sheet

## Control Zone™

### Part Number

60-102923

### Specifications

**NControl** Reactive Urethane  
Green Pearl Polished finish  
Hook Potential: 18.5 - 10.5 (dull/shiny)  
Typical Length: 4.5  
Typical Backend: 11  
RG Maximum: 2.594  
RG Minimum: 2.545  
RG Differential: 0.049  
Average RG: 4.9  
Track Flare Potential: 9.3

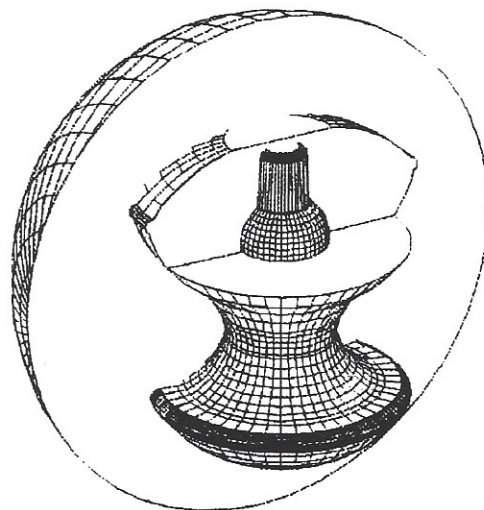

### Reaction Characteristics

The Control Zone's all new **NControl**™ reactive coverstock developed jointly by Brunswick and Bayer is a special formulation designed for the stronger player on broken down lane conditions. For higher rev players, the Control Zone will be cleaner and less sensitive to track breakdown in the front part of the lane and have better backend recovery than the PowrKoil series. The **NControl** coverstock complements the PowrKoil series by providing the reaction power players need when the lanes breakdown. Players with more normal rev-rates will see a medium hook potential performance that is best suited for medium to dry conditions.

### Drilling Information

All weights of the **Control Zone**™ can be drilled using the techniques developed for two-piece balls. See Brunswick's "Seven Popular Layouts" for detailed drilling information.
