

**Introducing Demolition Zone™. Brunswick's newest "wrecking ball".**

Demolition Zone levels the playing field — literally — blowing away pins and competition alike.

Its reaction: a perfect fit for most high-performance bowlers, delivering plenty of length and a big backend. The result: controlled destruction of everything in its path.

*Raze the roof and let 'er rip.*

# BRING THE HOUSE DOWN

An explosion waiting to happen: The added length of Demolition Zone's

high-tech core system acts as a longer fuse, delaying the blast of backend

reaction from Brunswick's PowrKoil 18™ Reactive coverstock.

Coverstock: PowrKoil 18 Reactive | RG Max: 2.579 | RG Min: 2.531 | RG Diff: 0.048 | RG Avg: 4.5 | Hook Potential: 105 | Length: 105 | Typical Breakpoint Shape: 75

WE INNOVATE. THEY IMITATE. **ZONE**

# Damage Report.

The Zone Reactive Series targets bowlers looking for balls in the "Aggressive Reactive" high-performance spectrum. Today, with a higher RG core system than other PowrKoil 18™ balls, Demolition Zone™ hits this market dead center. With a breakpoint farther downlane, it generates a more violent skid/snap arc. The PowrKoil 18 coverstock refuses to detonate early and lose traction, preserving the high hook potential, aggressive mid-lane and backend recovery that has made the Zone Reactive Series famous. An ideal league ball. A potent force of length and strength. Taking pins apart. Undoing any so-called competition. A regular demolition derby.

## Going Reactive.

The Zone Reactive Series provides a full range of aggressive Reactive coverstocks, designed predominantly for mid-range physical games on typical league conditions.
