

Rhino Reigns.

URETHANE COVER STOCK. The only 100% top-grade urethane ball with five custom-formulated systems; developed in conjunction with professional and amateur bowlers.

WEIGHT BLOCK. The process-integrated pancake weight block is chemically bonded to the core.

LASER ENGRAVED LOGOS. This state-of-the-art process allows refinishing or resurfacing while maintaining the integrity of each engraving.

SUPER RESILIENT CORE. Our unique Rhinolene™ core keeps pin trajectory low on impact.

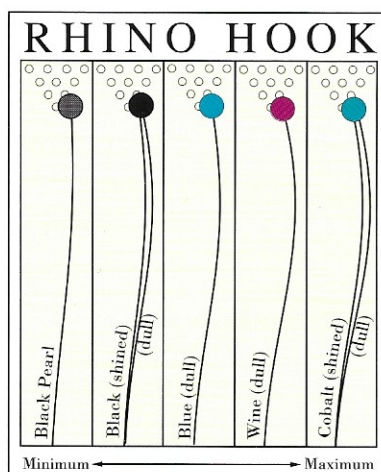

The Hardest Charging Ball In America.

The Brunswick® Rhino reigns. The Rhino is our top-of-the-line 100% top-grade urethane ball, designed to tame any lane condition and improve any bowling style. This monster charges down the lane, crashing through the pins with minimum deflection. Giving you a very special delivery: The power of a Rhino.

Each formulation has been tested and proven by professionals, amateurs and lab technicians. That's why Rhino's five different breeds (and colors) bring the high

performance bowler every important point.

The aggressive **Cobalt Rhino** is king of the beasts on heavily-oiled lanes. The **Wine Rhino** hooks early to control oily lane conditions. The Gold Medal-winning **Blue Rhino** rules on medium to oily lanes. Our proven tour winner, the **Black Rhino**, masters medium to dry lanes. And the **Black Pearl Rhino** is designed to dominate dry conditions. Unleash the hardest charging ball in America — The Brunswick Rhino.

Brunswick®
Making Bowling Better

Rhino's are available in: 12, 14, 15, & 16 lb. weights.
