

$X=Y \times 12 \times Z=?$

$12 \times Z+9$

# You do the math!

Adding this ball to your arsenal will equal success!  
2.495 (Low <sub>RG</sub>) x .055 (High <sub>Differential</sub>) + SH3 PLUS™ (Cover Stock)=  
D/T Pro Rev-X

$6 \times 9 - Z =$

$X \times Z \times 9$

## No Matter how you do the math,

Flow-In™ Core + Power Band™ = Dynamic Turning Capability

Bowler + RevX = Big Hook

Bowler + RevX = Major Pin Action

Bowler + RevX = Many 300 Games

*Dyno-Thane has the winning formula*

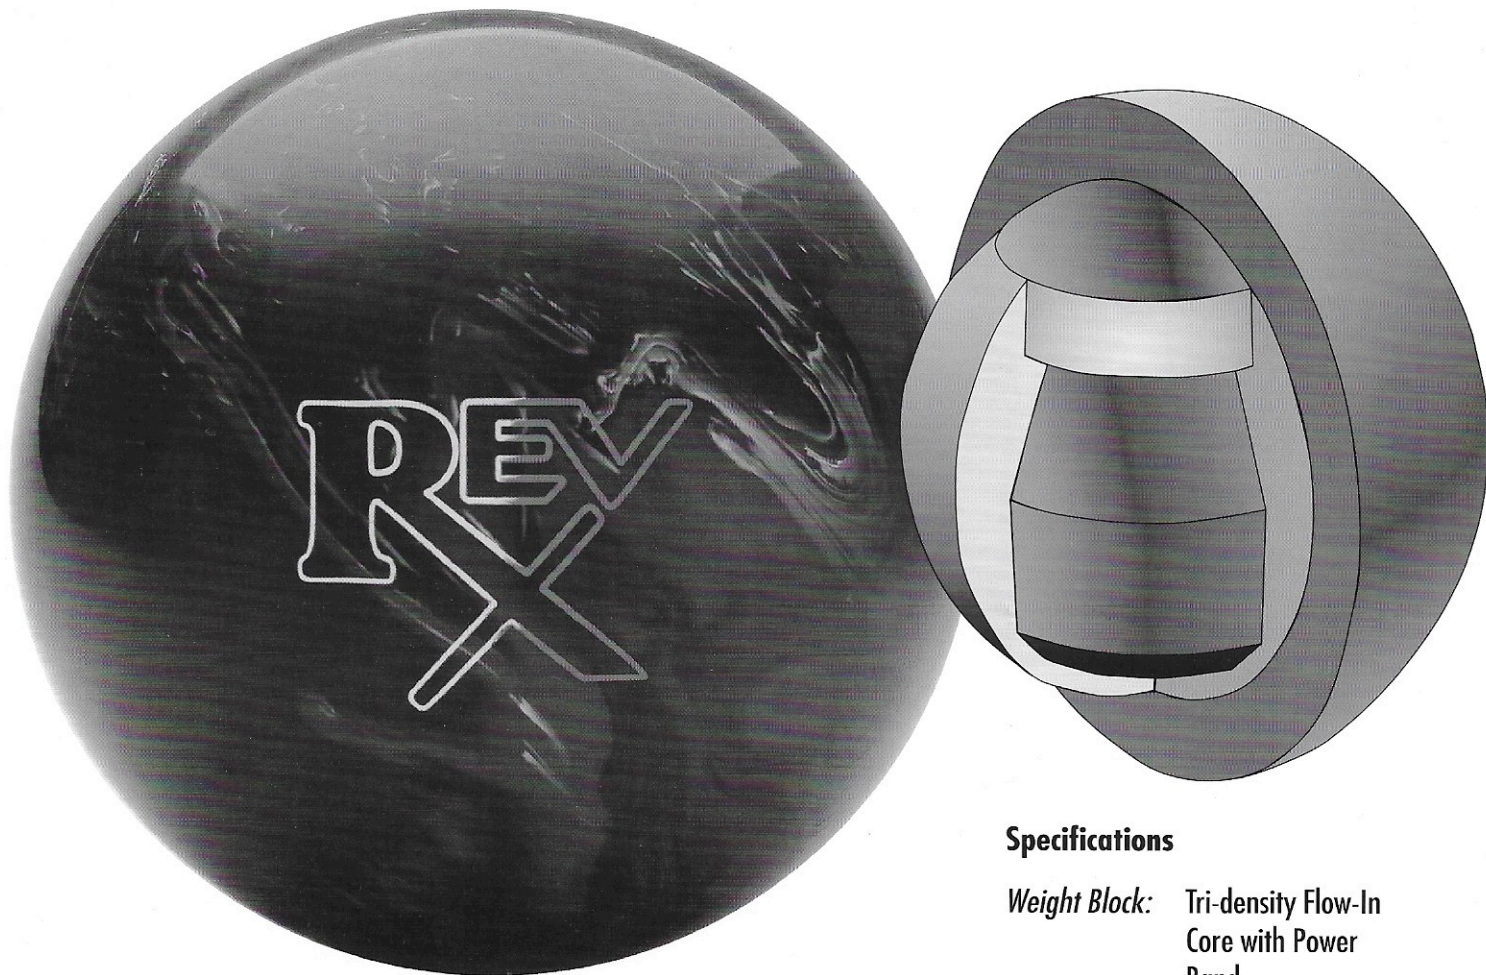

$Y \times 4 +$

$7 \times 8 - Y =$

## **Dyno-Thane D/T Rev-X**

The Rev-X features an all new condensed multi-density Flow-In™ Core with Power Band™ technology for built in mass bias and ample differential (.055). By condensing the weight block, the RG is lower than any previous Dyno-Thane (2.495), for fast revving action. The built in Power Band™ is marked with a locator pin and engraving, making the Rev-X easy to layout for drilling and fine tuning accuracy.

The Flow-In™ Core is surrounded by a solid outer core maintaining dynamic parameters throughout the weight range.

The D/T Rev-X offers a new SH3-Plus™ cover stock. The SH3-Plus™ cover offers high friction and is suited for heavy oil.

Matching the SH3-Plus™ material with the modified Flow-In™ Core, the D/T Rev-X is sure to rev up and give generous recovery on heavily oiled conditions.

### **Specifications**

**Weight Block:** Tri-density Flow-In Core with Power Band

**Cover Stock:** SH3-Plus

**Weights:** 12 - 16 lbs.

**Finish:** Satin Sanded

**Color:** Foliage Green

**Pin Position:** 0 - 5"

**Flare Potential:** 6" plus

**Typical Length:** 4 on a scale of 1 - 10

**Hook Potential:** 19/15 Dull/Shiny  
on a scale of 1 - 20
