

Revolution IST Navy

Revolution IST Green

Revolution IST Purple

The new Revolution IST™ Navy utilizes the same coverstock found in the 'IST-Green' with an all new core design for the Revolution IST family. This new core design provides a more skid snap arc than the previous Revolution Proactive balls. The traction effect built into all formulations of Proactive™ coverstocks results in a strong but smooth reaction on the lane that is less skittish or squirty at the breakpoint compared to reactive urethanes. The type of roll that Proactive urethanes generate inspires confidence in the strength of the reaction and the repeatability of the shot, leading to a stronger sense of control even when the ball hooks a lot.
