Suggested Cleaner: Moonshine™ Particle Polish & Cleaner

Resurfacing: Follow the steps below to take the ball back to *out of the box* condition.

Items needed: Burgundy, Green and Gray Scotch-Brite™ Pads, a ball spinner, water and Storm Step #2 polish. All sanding should be done on four sides of the ball. Side one - center of grip up, flip the ball 180 degrees for side two, turn 90 degrees for side three, and flip another 180 degrees for side four.

1. Using a Burgundy Scotch-Brite Pad, sand the ball for 90 seconds on each side.
2. Using a Green Scotch-Brite Pad, sand the ball for 90 seconds on each side.
3. Using a Gray Scotch-Brite Pad, sand the ball for 90 seconds on each side.
4. Use Storm Step #2 Polish on two sides of the ball for 90 seconds on each side.

To touch up the surface, skip steps 1 & 2; just use steps 3 & 4.
