

"This ball's going to fit perfectly in my arsenal between the 811A and the 912T."

- Mike Fagan, Track PBA Staff

SMART CORE DESIGN...

Meets Smart Cover Design.

GenX C/T Hybrid Technology provides a strong, consistent ball reaction with more forgiveness at the breakpoint.

Legion 2 Turbo Core Design matches up with any bowling style.

Designed to handle the widest variety of lane conditions possible.

BUILDING AN ARSENAL:

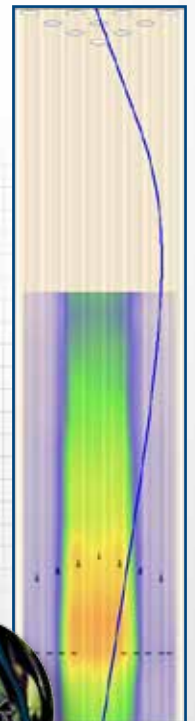

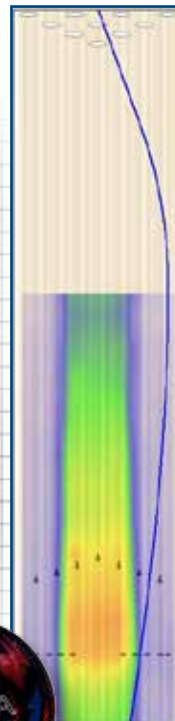

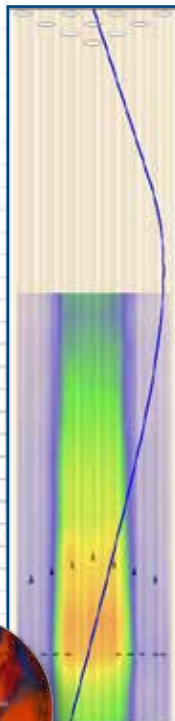

AT TRACK, we're always looking for the most innovative, technological ways to improve a bowling ball. We take improvement pretty seriously.

The 912T out-hooked and out-performed every Track ball in history.

The 811A Special Edition created great entry angle for a wide variety of bowlers.

The new 811C/T gives you the ultimate in continuation and traction, while maintaining performance on a wide variety of patterns.

It's easy to see how these balls will perform for you. Look at the Powerhouse™ Blueprint graphs to the right, and then visit your local pro shop to get everything you need to bowl better.
