## CONSTRUCTION:

Center heavy three-piece ball consisting of a dense symmetrical core, super dense flip block and a versatile and highly reactive cover stock. Color wine. Weights 10 - 16.

"The Mongoose Optimum-R has a very smooth and predictable reaction. Goes through the heads smooth, yet rolls and drives hard on the backend. Hits as hard as any resin ball on the market today."

*Jeff Shaw*  
Jim Maxey's Bowling Supply

"The Mongoose Optimum-R provides optimum performance with a predictable and stable roll with optimum hitting power."

*Paul Wheat*
