

Roto Bandit II!

Roto Grip, The originators and leaders of high performance bowling balls for 40 years, introduces the ROTO BANDIT II. The first reactive urethane bowling ball that hooks on oil. This is made possible by *Roll and React Technology II* with *grip a thane* additive. Surpassing every other product on the market, the ROTO BANDIT II, is destined to revolutionize the bowling industry. Constructed of 100% reactive urethane, the ROTO BANDIT II has the characteristics of a low radius of gyration ball with tremendous back end flip. It reacts to oil in the pines like no other reactive bowling ball to date.

Nobody likes a cheater. We don't condone stealing, but putting your hand in a ROTO BANDIT II will make you a legal thief.

Remember, *Roto Grip...The only balling ball manufacturer that guarantees a lifetime warranty!*
