

The ENFORCER

NOTHING CAN TOUCH IT!

BLUE . . . The ultimate weapon in the ENFORCER® arsenal - designed for long oil conditions. Highly porous surface for maximum traction on even the wettest lanes.

BLACK . . . This mid-range weapon handles a wide scope of lane conditions. Moderate porosity and lightly polished, it holds the line on medium to short oiled conditions.

MAROON . . . Provides short oil enforcement. Low porosity, highly polished surface for optimum skid. Puts the energy where it counts - at the pins.

THE PRO'S CHOICE

Dual weight blocks and thick urethane shell minimize ball deflection. Built-in shock absorber helps to achieve optimum pin carry and heavier roll.

POLYESTER ENFORCER®

DEEP RED . . . Designed for uncontrollably-hooking or short-oiled conditions. The polyester ENFORCER® is constructed the same as its urethane counterpart.
