

# EXPLOSIVE PERFORMANCE

## NITRO

The exclusive Dynamic Core gives the Nitro a precise area of concentrated weight so it skids longer, hooks later and harder.

The Nitro shell contains more than 11.5 pounds\* of high performance urethane. Plus it has two unique additives: AJ151, a special agent for more surface contact with the lane than any other ball on the market; and the advanced compound HD106 for a more powerful, harder-hitting shell that absorbs impact better than the competition.

\*11.5 pounds of urethane in 14, 15 and 16 pound balls. Ball also available in 12 pound.

## NITRO BALL EVALUATION

The new Ebonite Nitro, a unique combination of chemistry and technology; it is a 2-piece ball with a specially formulated urethane shell and a precisely placed Dynamic

Core. The result is the most advanced ball to be released on today's lanes.

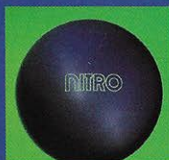

The Ebonite Nitro has been tested time and time again in test facilities and on a variety of lanes. But more importantly, it has passed the toughest tests of all — the tests of PBA/PBLT players and amateurs. In fact, 15 professional

bowlers who tried Ebonite Nitro preferred it to other balls — among them Earl Anthony, Alota Sill, Leanne Barrette, Walter Ray Williams, Jr. and Pete McCordic.

Release the power of chemistry and technology in your game with the powerful performance of Ebonite Nitro.

## PERFORMANCE CHARACTERISTICS

Polished or sanded, the 2-piece Ebonite Nitro hooks much later on long oil, rolls harder and reduces pin deflection.
