

The power to eclipse everything under the sun.

INFERNO

Introducing the Inferno™ – featuring
the revolutionary Activator™ coverstock.

Inferno's new Activator coverstock eclipses the performance of everything that has come before it. Combining an Ultra-Low RG core with the Activator Advanced Reactive coverstock gives the Inferno strong mid-lane recovery that features improved traction in the oil and a smoother, more effective reaction to the dry. Inferno's continuous downlane driving force has the power to bite through carry-down without breaking loose and delivers aggressive hooking action from the breakpoint through the pins. For the power to play, it's time for the Inferno.
