

BIRDS OF PREY.

The WarHawk/XR offers the same proven performance as the original Warhawk, but is extra reactive as well. This allows it to dig into the lane for an even sharper angle of entry while maintaining the drive and finishing power of the original WarHawk.

The WarHawk and the WarHawk/XR are the latest in a series of winning products from Champions. The new Cobalt Pearl WarHawk/XR is a natural extension of an already exciting and proven product line.
