

THE WARHAWK ATTACKS.

The Hawkeye weightblock delivers additional revs, power and torque while storing energy for drive and power through the pocket.

The Red WarHawk, from Champions, displays its aggressive tendencies the moment you set it loose upon its prey. It smoothly glides down the lane until the point of attack. That's when the fun starts. The WarHawk digs in its claws and swoops into the kill zone with a ferocity you'll marvel at.

The WarHawk's predatory performance is built upon our new Hawk Claw reactive coverstock, that grips the lane tighter than previously thought possible. This allows for

a startling backend move to the pocket that delivers all the deadly power you're ever going to need in a bowling ball. Champions' products are proven winners on the PBA Tour and in league play everywhere. So get your hands on a Red WarHawk and watch your scores soar.
