

Thousands of tracking specks to help your scoring specs!

New Classic SR — made for today's lanes where you need extra traction for better scoreability.

It's new! For the first time a soft, blue rubber ball great enough to carry the famous three white dots. Look at the surface. Instead of being highly polished, it's precision sanded to give you better scoreability. All those tracking specks are a different density from the cover stock. This gives the Classic SR an uncanny ability to grab the lane and track better. So, add a few pins to your scoring specs... bowl the blue Classic SR.
