Mission Objective: Double Agent™ Stabilization

With the ever-changing environment and illusive opposition, **new conditions emerge**. As the Agent™ effectively conquers medium oiled lanes, the agency has developed another masterful device to combat even the heaviest oiled lane conditions. Equipped with an ultra-low RG/EMC™ weight block/core design and Reactor™ pearl particle coverstock this device is essential for neutralizing the opponent. Use this along with the proven Agent™ device to ensure condition control — Doubling your chances for success.
