

Send a clear message... you have a score to settle!

The *Vendetta* core and coverstock combination allows for a smooth transition from skid to roll. The *Vendetta* clears the front part of the lane with ease not checking up like many of the balls launched today. Amazingly stores energy until mid-lane where the transition from roll to hook is crisp and precise. The backend reaction is strong and continuous. Getting the job done is what the *Vendetta* is all about, so show 'em whose boss!
