

B I G B A D WOLF

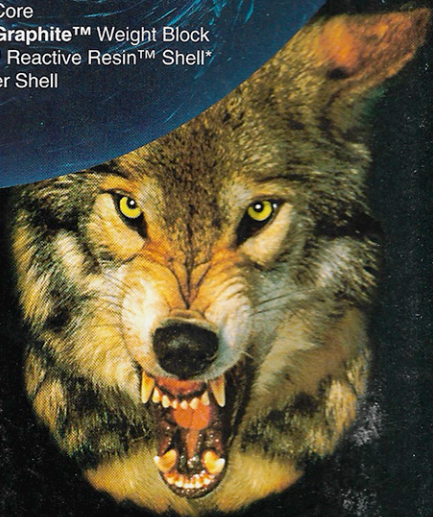

- 3.6 g/cm³ Zirconium Core
- 6.0 g/cm³ **Tungsten Graphite™** Weight Block
- 10.25 lb. Mega Bite™ Reactive Resin™ Shell*
- 600 Grit Sanded Outer Shell

The **Wolf** is the newest, most advanced bowling ball in Ebonite history. It features a unique zirconium core configuration that is the only one of its kind in the industry. The high differential zirconium core and high density **Tungsten Graphite™** weight block are encased in a 10.25 pound shell of Mega Bite™ Reactive Resin™.

When you release the **Wolf**, you release raw power that chews the pins apart. It revs quickly through the front part of the lane and continuously through the backend. It will not, does not, deflect off pins. The **Wolf** has the highest coefficient of restitution of any Ebonite ball on the market. It has a medium/low radius of gyration, a high flare potential, and the greatest angle of entry of any Ebonite ball...ever.

**IN FINISHED 14, 15, AND 16 POUND BALLS.*

EBONITE  **PROFESSIONAL**
