

PRO-MAKER

THE MANHATTAN COMPANION

Now there's a hard rubber companion to the world famous Manhattan Soft Rubber. Suited for drier lane conditions, the Pro-Maker has the exact composition of the Manhattan except for a harder, less porous surface.

Pro-Maker hard rubber and its companion are super premium balls. Each has a unique one inch thick rubber shell for controlled performance. Every ball is hand weighed in six positions to assure perfect balance and exceeds the minimum ABC specifications for roundness and size. No other balls achieve these high quality standards.
