VORTEX V2

Ebonite

TRIMAX19 REACTIVE COVERSTOCK

Long before GSV-1 and GB 10.7, there was our Trimax Reactive Coverstock, used on the original Vortex and Matrix series. Trimax was the most aggressive coverstock for Ebonite during its time. Compared to today's coverstock formulations, Trimax created less friction in the oil.

Our new Trimax19 maintains aggression at the backend of the lane, but now features a stronger reaction in the oil due to its updated formulation.

MODIFIED V2 CORE

The Modified V2 Core features a lower RG and higher differential combination compared to the Enhanced V2 found in our Game Breaker series. These new core numbers are almost identical to those seen in the original Vortex V2.

The modifications in density allow this V2 to rev up easier and offer more total hook than ever achieved in any Game Breaker released to date.

COLOR: Black/Blue
FINISH: 500/1000 Abralon™
CONDITION: Medium To Heavy Oil
REACTION: Strong Midlane & Backend
MASS BIAS: N/A (Symmetric)

WEIGHT	RG	DIFF
16 Lbs	2.47	0.047
