ONLY BRUNSWICK GIVES YOU AN EDGE ON ANY LANE CONDITION.

When lanes are on the oily side, there's no better ball to have on your side than the original Edge®. Its special urethane cover grabs even the oiliest of boards for a consistently true hook into the pocket roll after roll. And its technologically advanced rubber core means more drive-through the pins. More action.

On less oily lanes, you can't beat Brunswick's new Edge II®. Its secret is a unique, urethane cover that's slightly harder than the original Edge, to give your shot a longer slide before it starts to hook. So frame in and frame out you're right on the money.

The Edge and new Edge II. Incredible scoring machines from Brunswick.
