

YOU WERE WARNED!

Introducing the birth of El Niño!
Featuring the all new Motion Control Core (MC²). This advanced core design features "Vertical Dual Density" Technology, a weight block in which the vertical differential of specific gravity is .40 creating built in core mass bias.

Differential - .055 (Med. - high)
Back End - 9 on a scale of 1-10
Length - 4 on a scale of 1-10
Track Flare Potential - 6" Plus
Radius of Gyration - 2.490 (Low)
Hook Potential - 19/13 Dull/Shiny
Factory Finish -1000 - Grit Wet Sand

Experience the most destructive "child" phenomenon from the **STORM** line of high performance bowling balls. If you live on this planet, then you have felt the unrelenting force that El Niño continually produces, making it simply impossible to escape it's grasp! In light of these facts two questions remain...

Are you prepared? Or will you perish?
