RG: X-Axis	RG: Y-Axis	RG: Z-Axis	MASS BIAS DIFFERENTIAL
2.534	2.583	2.559	.024 (15 lbs.)

A DESIGN OF EPIC PROPORTIONS!

The EPIC™ is a revolutionarily designed high performance asymmetrical ball from Roto Grip™. Once again we have taken technology to a higher level with our brand new Maximus™ core. This asymmetrical weight block has an RG-Differential of (.050) for maximum flare potential along with a Mass Bias Differential of (.024) for a spin rate of EPIC™ proportions.

The cover stock surrounding the Maximus™ core is our aggressive Ultimate Vision™ solid reactive, made from the finest Grade "A" reactive urethane found on the market today. The EPIC™ was designed to give you a quicker spin rate for better mid-lane, and energy retention all the way to the pit.
