

Don't just beat the competition... **ERASE-IT™**

Upon the introduction of the Eraser™, a higher standard in performance, quality and workmanship was set in the mid priced bowling ball arena. Still today no ball in this price category has the hook or the look of the Eraser. No ball until now that is!

The new STORM Erase-IT™ features the same weight block and coverstock as the best-selling Eraser with one difference, no pearl.

A sanded solid ACCU-Tread™ coverstock boasts earlier roll with stronger arcing characteristics more suitable for heavier oil conditions and/or players who could use some "help" getting roll in the mid-lane. Players who choose to polish the Erase-IT will still experience a strong, but more manageable mid-lane and smooth transition for greater backend control.
