

# GREAT BALLS

OF

# FIRE STORM

The most exciting ball of the year now comes in two distinct power-packed versions. The **monster backend dynamics** of the original **Firestorm** are now complemented by the earlier roll and **energetic directional shift** of the new **Forest Firestorm**.

The same proven Firestorm weight block, this time rotated 180°, is coupled with a sanded reactive shell. The result is a ball that revs up earlier and sustains driving momentum to deliver backend clout with attitude - **FIRESTORM ATTITUDE**.
