

Be careful what you ask for...

RELENTLESS HOOK! UNSTOPPABLE POWER!!!

FUSION HOOK
MONSTER

You want hook? Don't say we didn't warn you! Because this is the most aggressive ball in AMF history—combining the power of a computer-engineered dual-mass bias with the relentless grip of a new-generation VEER X particle cover.

The Fusion Hook Monster revs up hard, to plow through oil, hook continuously, and mow down the pins with energy to spare. And since it's versatile enough for any oil condition, it just might be the secret weapon your game needs. But only if you're sure you can handle it.

Because once the Hook Monster gets loose, there's no stopping it.
