

TRIUMPH THROUGH ADVERSITY

PRO-THANE™ • PARTICLE • COVERSTOCK

Produces a huge Footprint for superior contact on the lane surface. In turn, creating a more balanced reaction.

More Coverstock adjustment options than any other particle technology product available.

Vertical Dual Density for built-in Mass Bias, creates continual motion for increased energy throughout the entire lane.

Precise layouts for more exact back-end reaction. Resulting in more accurate and consistent results than ever.

MOTION • CONTROL • CORE™

As we enter the new Millenium... expect all this and more from the company who continues to set the standard in product design and excellence.
