

SMOOTH!

Once again Roto Grip® continues to move to the forefront with the introduction of the all-new **Mercury™**

The **Mercury™** is an entry level ball energized by the newly designed **Orbiter™** core, this high RG/low differential weight block delivers increased rev rate in the mid-lane along with smooth continuation down the lane.

Encapsulating this new power plant is the always successful **Sure Grip II™** pearlized reactive coverstock. This mild reactive blend gives you smooth acceleration through the heads and dependable backend motion through the pins.

**ROTO
GRIP**
KING OF THEM ALL!
