

TAKE FLIGHT

MEDIUM OIL

The Ripcord™ Flight builds on the impressive characteristics of the Venom™ Shock, creating an incredible benchmark ball. Built to handle more oil volume than a Venom™ Shock, it perfectly balances the characteristics of a solid cover while also providing more shape down lane. When the Venom™ Shock can't create enough angle or combat the volume on the lane, the Ripcord™ Flight is exactly that ball.

TURMOIL™ MAX SOLID REACTIVE

Turmoil™ Max Solid Reactive coverstock builds on the coverstock originally used on the Venom Shock. This cover handles more oil volume to create an incredible benchmark ball.

OBLIVION™ WEIGHT BLOCK

The dual-density Oblivion™ weight block provides length through the front of the lane while retaining energy for an explosive reaction down lane.

3000 GRIT LSS FINISH

The 3000 Grit LSS finish is tuned for medium oil to provide more traction through the oil.
