

THEY'RE BOTH HIGH PERFORMANCE MACHINES,
BUT THE ONE IN THE FRONT WORKS BETTER ON A LANE.

nvs

The letters "nvs" are rendered in a large, white, outlined, lowercase font. They are superimposed over a large, dark, reddish-brown planet with a textured surface, possibly Mars. The planet is partially obscured by a dark, curved horizon line at the top.

The new NVS takes the next step in performance. You don't just throw it, you drive it. With its new Traxion Reactive 0.39 coverstock and version 1A Spike Symmetric Mass Bias core you get an even stronger mid-lane roll with backend continuation. Drive one today at your pro shop.
