

# Brighten Your Future!

## THE ORACLE VISION™

Take your future into your own hands with the all new Oracle Vision™.

We have modified the already strong asymmetrical Cyclotron™ core to give you added performance from start to finish. The all new Cyclotron V™ core gives you a lower RG (radius of gyration) to create a quicker spin rate while keeping the differential high (.050) providing continuous hook down the lane.

The crowning touch is the introduction of an all new coverstock. The Ultimate Vision™ pearl particle coverstock delivers the traction of a solid particle coverstock in the front of the lane and the backend motion of a pearlized reactive down the lane.

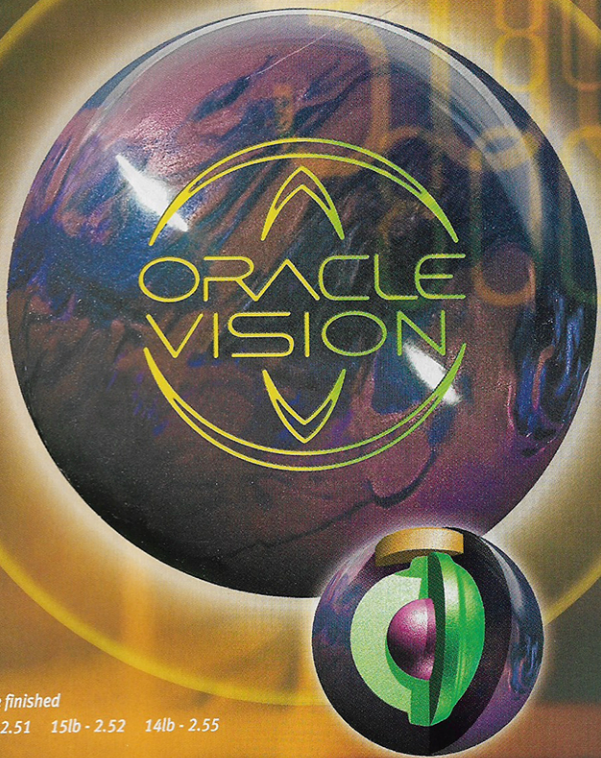

*This combination of power and traction will brighten your future!*
