

Catch The Wave

**THE NEXT WAVE
OF STORM
TECHNICAL EXCELLENCE
HAS ARRIVED!**

Introducing the PACIFIC STORM, another new and innovative product complementing the already versatile Storm Line of proven performance bowling balls.

This highly dynamic ball incorporates yet another technical advancement in weight block/coverstock design. The DP4 weight block with its unique dual-polar flip mass is wrapped in a Versa HK-4 balanced pearl shell – a combination that allows the PACIFIC STORM to surf cleanly through the front and middle portion of the lane, storing energy for a crushing backend reaction.

For sheer performance the PACIFIC STORM compares to balls that retail for \$180 to \$200 *at a suggested retail price of \$129!* Bowling evolution continues with affordable technical excellence from STORM!
