

RISE LIKE A PHOENIX

Core: Ascent™ Power Core
Coverstock: DSR™ (Dura Soak Resin)
RG: 2.45
Diff: 0.050

OUT OF THE ASHES COMES THE “PHOENIX” FROM TRACK. This ball has been developed from a computer generated program which uses basic physics and geometric principles. Those principles along with the data that we received from field tests insure the compatibility of this ball for a variety of bowlers on a variety of lane conditions. The Phoenix introduces both a new core – Ascent™ and a new cover – DSR™ (Dura Soak Resin). The Phoenix also features the new TCS™ 4000 finish which is the most “tunable” finish on the market today. Check out all the latest info and technical specs at www.trackbowling.com.
