

You can't feel the teeth. But you can see the bite.

The all new Brunswick Pro Trac. The specially formulated performance ball that puts action and control right where they belong. At your fingertips.

The Pro Trac was designed to slide through the head of the lane and then take a bite. The unique friction additive of the Polytrac™ cover gives you controlled hooking action under a wide variety of lane conditions.

The Pro Trac has a striking

difference on the inside as well. A super resilient core resists deflection and gives the Pro Trac more striking force. With this dyna-power core, the Pro Trac slams through any pocket.

Now, no matter what your average is, bite back with the power and control of the all new Pro Trac by Brunswick.
