The Tournament Special Edition line has been created to give serious tournament bowlers the perfect compact arsenal to cover all eventualities in tournament play.

The Solaris TSE mixes the control and good looks of the Black-out with the length and back end of the Platinum with a strong drive through the pins.

At box surface, the Solaris TSE achieves moderate to good length and displays controlled aggression off the dry boards. The Solaris TSE is the perfect benchmark ball for any tournament bowler.

If you are creating a tournament arsenal, you really have no need to look past the Seismic TSE line.
