

Sparks are gonna fly.

SPIRIT II
REACTIVE

When we team up with our urethane supplier, BASF®, the game catches on fire. Well, we've ignited the lanes again with our new Spirit II™. You're game for this high-performance, polished pearl of a ball that won't polish off your budget. When the two-piece performance core and the reactive particle coverstock light up in medium oil, sparks fly. So turn up the heat.

Enjoy the fireworks.

Columbia bowls the world over.
