

SCIENTIFIC FACT

Red is HOT!

RED
HOT

BLUE
HOT

Blue is HOTTER!

According to the laws of physics, the temperature difference between the blue portion and the red portion of a **FLAME** is significantly different. Although both produce intense heat, the blue is definitely hotter! Therefore, if you wish to become a Flamethrower and scorch the competition, we suggest you add the Red and New Blue Hot with Curleyon2™ coverstock to your arsenal of **STORM** weaponry. You know what they say, if you can't stand the heat...
