

HIGH OCTANE PERFORMANCE

Solid

Pearl

Reliability and performance best describe the new Street Rods™ from Storm®. On the outside, these beauties feature the Reactor™ coverstock, true beyond any doubt to give reliable motion on today's demanding lane patterns. But beauty is more than just skin deep!

Inside you'll find a muscular modified 2-piece Turbine™ power plant. By chopping the mass and adding a flip block on the bottom, we dropped the RG and raised the entry angle. The result – massive backend and 0-60 feet with *tenspins flat!*
