

Zero to 60 "n ten flat!

On fire! Our new Throttle Up™ lets 'r rip with unforgiving power and control, creating pin action that's a gas! It's what you'd expect from the high-speed, polished MuscleGT™ coverstock. And that's just for starters. The Cam Shaft™ core fuels the flames with a higher Rg (2.52) an lower differential (0.048) to rev later down the track. Face it. Throttle Up dominates the road, exploding straight down the middle with its eyes on the prize. Competition's in the ashes.
