Thunderbolt DUAL BLOCK™

Only the new Thunderbolt Dual Block gives you Ebonite's exclusive dual weight block. Its unique shape more precisely counterbalances the weight extracted by drilling, producing a more consistent, stable roll, a more

predictable arc, and greater hitting power.

Every Dual Block also features Ebonite's highly cross-linked polyurethane elastomer shell, for less pin deflection and a more controlled hook on heavy oil.

The result: better performance potential in every frame.

Look for the Thunderbolt Dual Block at fine pro shops nationwide.
