

MIX OUR LATEST
BOWLING BALL
WITH A FEW BOWLING PINS AND
KABLAMO,
YOUR OPPONENT WILL BE PICKING
BOWLING PIN SHARDS
OUT OF
HIS FACE
FOR A WEEK.

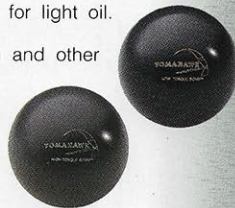

Say hello to the Tomahawk X-plosion, the latest ball to harness the power of Ebonite's BOMB technology.

The X-plosion combines our revolutionary high torque BOMB (for **B**all's **O**ffset **M**ass **B**ias) design with our new Detonator Plus Reactive Resin,[™] which tightly grips the hardwood in heavy to medium oil. The result is a ball that

hooks harder than anything you've ever seen.

The Tomahawk X-plosion is just one of three Ebonite balls with the power of the BOMB inside. The Tomahawk High Torque cuts through heavy to medium oil, and the Tomahawk Low Torque is designed for light oil.

To see the X-plosion and other Tomahawk balls, visit your nearest pro shop today.
