

Put the Hammer Down!

TOP FUEL™

In the competitive market of High Performance bowling balls you must have an edge to get ahead.

Roto Grip® continues its constant quest for state of the art technology, and the Top Fuel™ is no exception. We took the Cyclotron™ core from the original Fuel™ and combined it with the all new Ultimate Grip™ reactive coverstock to give you one of the strongest reactive balls ever made.

The Ultimate Grip™ reactive coverstock has a special additive found in the polymer industry to enhance friction. This translates into more "hook" throughout the lane and enhanced backend reaction. The coverstock is easily adjusted with the use of scotch-brite pads and polishes.

TECHNICAL DATA

- Factory Finish - 1000 Matte Finish
- Radius of Gyration - 2.54 (Medium)
- Differential - .050 (High)
- Hook Potential - 23 (25 Scale)
- Track Flare Potential - 7+ Inches
- Length - 6 (10 Scale)
- Backend - 10 (10 Scale)
- Coverstock - Ultimate Grip™ Reactive
- Weight Block - Cyclotron™ Core
- Color - Navy / Ocean Blue
- D-Scale - 73 to 75
- Available Weights - 14-16 Pounds
- Logos - Roto Grip, Top Fuel™, "4 Prong Star" Center of Gravity
