

# Meet the ROTO-GRIP STARS

**ROTO-STAR UC-2 URETHANE**  
Urethane shell provides a high co-efficient of friction for heavy oil lane conditions. Low pin trajectory is coupled with superior tracking characteristics which results in minimum skid and maximum roll.

**ROTO-STAR TRA-KER  
POLYESTER**  
A totally new concept in bowling ball design. Polyester economy, Urethane performance, truly the best of both worlds using a blended formula of polymers never before used.

**ROTO-GRIP SOFT POLYESTER**  
"Blue Roto" is an exclusive formulated soft pearlized polyester ball with Complete Weight Distribution. Special additive to shell of ball delays initial roll and provides for strong finish on medium oil lane condition.

## **CONSISTENCY**

professional performance that you can count on each and every time.

**ROTO-GRIP GIVES IT!**

## **VERSATILITY**

responsive to a variety of bowling styles and lane conditions.

**ROTO-GRIP HAS IT!**

## **POWER**

where you want it and when you need it.

**ROTO-GRIP DELIVERS IT!**

## **QUALITY**

that stands head and shoulders above the competition.

**ROTO-GRIP MAKES IT!**

*Roto-Grip bowling balls are light years ahead of the competition. See them at your Pro Shop now.*
