

TRITON ELITE

NEW AND IMPROVED

That's right Track fans. Remember that amazing predictable benchmark motion the Triton Elite gave you? Well, it's back, but with an updated coverstock and a slightly modified core.

QR-7 SOLID

The QR-7 series was originally featured on the Track Cyborg a few years ago. Now, for the first time in a solid version, we are wrapping the QR-7 solid around the MC2 Technology core at a 2000 grit abralon finish to give you a big continuous hook on medium oil conditions.

MC2 TECHNOLOGY

MC2 stands for "Modified Core 2". We took the shape of the Core 2 Technology that was originally in the Triton Elite nearly 20 years ago. Our engineers then made modifications which raised the RG and lowered the diff very slightly. This core modification in combination with the new coverstock mirrors the Triton Elite motion that everyone used to love.

Specs	16lb	15lb	14lb	13lb	12lb
RG	2.51	2.51	2.53	2.53	2.60
DIFF	.040	.046	.045	.055	.039

CORE: MC2 TECHNOLOGY | **COVERSTOCK:** QR-7 SOLID | **COLOR:** PURPLE SPARKLE
FINISH: 500/2000 ABRALON™ | **LANE CONDITION:** MEDIUM OIL | **WEIGHT:** 12-16
REACTION: BIG CONTINUOUS HOOK | **INTER DIFF:** N/A (SYMMETRIC)
