

Chairman of the Boards.

I'm Phil Cardinale, President of Track, and this is my new baby. The Triton T.K.O.™ It's going to knock you and your competition for a loop. First, we added a dense ring around the Flip Arm of the Core²™ Technology core design to increase the ball's flare potential. Then we encased that in our new POWERPLUS-GOLD™ coverstock. It's an updated version containing a more aggressive Mica, to give the ball an even larger gripping surface. This combination of core and coverstock delivers the control you have come to expect from the Triton line while generating the most overall hook of any Triton ball. From one Board Member to another, here's to total domination.
