

ADRENALINE ISN'T ENOUGH!

TRAUMA RESPONSE™

Your heart is pounding, but the adrenaline is working like a weak cup of coffee. It's time to send the heat of the competitive spirit coursing through your veins. That competitive spirit is the all new Trauma Response!

STORM's innovation and domination continues with the release of the new Trauma Response. From the all-new weight block/core system comprised of five different densities, to an all-new particle 3-color coverstock, the Response offers an unprecedented ball reaction.

What are we talking here? We are talking HOOK!
And when Storm talks, bowlers listen!

FEATURES

- Vertical Dual Density Twin Cylinder Weight Block / Flip Block / Differential Block / Ceramic Integrated Core
- PRO-Thane MT™ Plus w/ Co-Polymeric Reaction Mixture™ Particle Technology Coverstock
- 3-Color Coverstock

BENEFITS

- Low Radius of Gyration with built-in Core Mass Bias for fast revving mid-lane, strong continuous backend, precise fine-tuning layout options and supreme hitting power.
- CRM™ Particle Technology is made from an exact mixture with select sizes of particles. This formula makes the coverstock less sensitive to oil, thus creating a more Responsive ball with unparalleled hook.
- Increases the ability to read the motion of the ball throughout the entire lane - A big advantage when reading the ball motion.
