

Be Xtreme!

STORM THE BOWLER'S COMPANY™

Triple Xtreme™

We've taken the Triple X Factor™ to the Xtreme... the Triple XTREME™ that is!

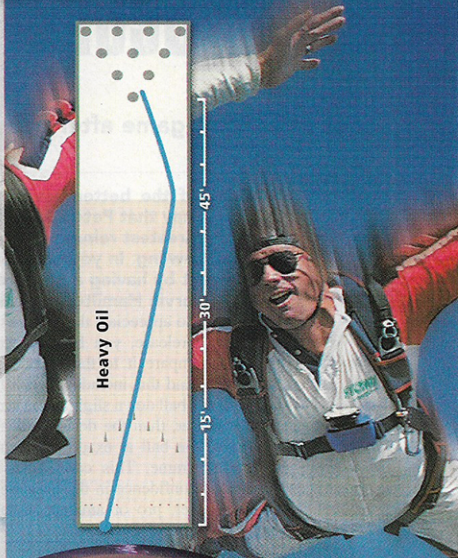

This ball generates a massive amount of torque and will make the corner on even the toughest of conditions. This is accomplished by combining our world-class ACCU-Tread™ solid reactive coverstock, preparing it to an 800-grit satin finish, then wrapping it around the dynamic RAD³™ weight block. The satin ACCU-Tread™ builds higher friction in the mid-lane and the RAD³™ creates a strong preferred spin axis that, in tandem, make the Triple XTREME really "lean" toward the pocket. If you take your game seriously and want that edge, then take your game to the XTREME!

FEATURES

- ACCU-Tread™ Solid Reactive Coverstock
- Inverted RAD³ Triple Disk Weight Block
- Strong Preferred Spin Axis

BENEFITS

- ACCU-Tread™ Builds High Friction
- ACCU-Tread Releases Energy Throughout The Entire Lane For Enhanced Mid-lane Performance And Strong Backend Continuation
- ACCU-Tread Increases Pocket Entry Angle In Heavy Oil
- ACCU-Tread Is Versatile And Easy To Adjust
- New Inverted RAD³ Technology Maintains Strong Dynamics For All Types Of Layouts And Desired Drillings.
- Strong Preferred Spin Axis With Mass Bias Differential Of .018 Allows You More Entry Angle.
