TURBO XL
RESIN

The most versatile Reactive ball ever developed. A multi-piece core construction delivers devastating power to the pocket. Through extensive testing by Ebonite's Pro, Amateur, and Research and Development staff, we have isolated a combination of characteristics in a reactive ball that fits an incredibly wide range of bowlers on wet and dry lane conditions. Approximately 4.25 pounds of Enhanced Reactive Resin™ in the finished 14, 15 and 16 pound balls, composed of a new polymeric blend, engineered from our original Reactive Resin™ formula, this reformulation allows for a lane gripping action never before thought possible.
