

CRUSH THE PINS WITH MAXIMUM THRUST

Featuring revolutionary
NeoMark™ Urethane Graphics.
Patent Pending.

“ I have never thrown a ball that gives me so much control, yet plenty of hitting power. ”

- Brandon Gibson

MADE IN U.S.A.

The versatile MOTIV™ TX1 is deadly in the hands of any bowler. It has a controllable reaction and drives incredibly hard through the pins. The TX1 features the Thrust™ inner core, MOTIVator-X™ reactive coverstock, and 2-color NeoMark™ urethane graphics.

NeoMark™ Graphics

The TX1 demands attention with 2-color NeoMark™ urethane graphics. Citrus Orange and Vintage White logos are featured on the TX1's Cobalt Blue coverstock.

Thrust™ Inner Core

Powered by the Thrust™ inner core, the TX1 drives incredibly hard through the pins with a mid-level RG that is difficult to slow down. The Thrust inner core RG is 2.54 with a differential of .052 (15# ball).

MOTIVator-X™ Reactive Coverstock

The TX1 bowling ball features MOTIVator-X™ reactive urethane coverstock. The Cobalt Blue cover is finished at the factory with 1000 Abralon pads and brought to a luster with our very own Power Gel® Polish.

Reverb™ Outer Core

The Reverb™ outer core of the TX1 is a low-density polyester resin with pin piercing hardness and strength. Rather than absorb impact energy, this outer core reverberates energy as it explodes through the pins.

ITEM NUMBER	MTVBTX01
INNER CORE	Thrust
