

THE BEST COMBINATION OF
CONTROL AND POWER
 SINCE THE REMOTE CONTROL.

Power and Control. Everyone talks about it. But only Columbia delivers. Introducing the all-new U-Turn Particle Pearl. Made for medium oil, it features the same core design as other U-Turns, but with more flare potential for a stronger transition. It's the perfect ball for the bowler who wants some of the midlane traction offered by particle balls without sacrificing a strong backend reaction.

At Columbia 300, we know how important it is to build the perfect arsenal. And we've been building the balls that have put bowlers in the winner's circle for over six generations. With the all-new U-Turn Particle Pearl, Columbia delivers yet another weapon that will help lead you – and your team – to victory.

Because it's League Night. Everybody's watching and it's time to take control. And when the team turns to you, you can turn to U-Turn.

WHEN BOWLING IS YOUR LIFE.

PROUDLY MADE IN THE USA
